Emergency Management Assistance Compact Resources in California

The Emergency Management Assistance Compact (EMAC) is the Nation's mutual-aid system that provides a formal structure where all 50 States and 4 Territories have the ability to share resources across State boundaries. The Cal OES EMAC Coordinator in coordination with Cal OES Fire Branch are working together to request and coordinate needed resources via the EMAC Compact.

- The following states have EMAC resources in California:
 - Oregon: 1 Type 1 Helicopter

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A low pressure trough will be over Northern California through Saturday. Afternoon SW-W winds from the Cascade-Sierra crest east and through the Bay Area and Delta will gust to 25 mph with a few spots up to 30 mph. In far northern areas NW-NE winds will gust to 25-30 mph over the higher terrain during afternoons and evenings through Saturday. Temperatures throughout the region will be near normal through Saturday. Inland relative humidity (RH) will continue to be 8-18% east of the crest and 12-25%. The marine layer has deepened to 2,500-3,000 feet and moved through the coastal range and into the Sacramento Valley overnight. Some inland mid and upper slope locations will still only see RH recovery to 35-45%, but in general overnight RH recovery has improved quite a bit.

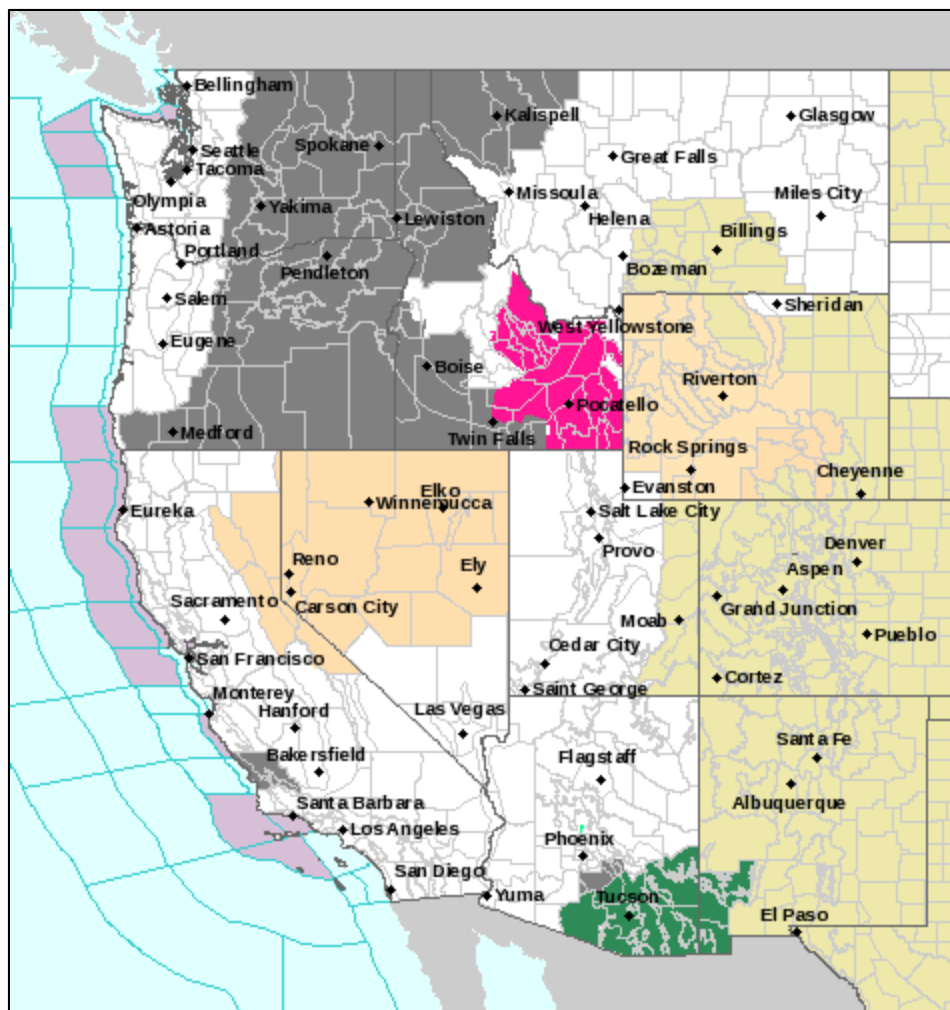

The trough will move off to the east on Sunday. SW-W winds near and east of the northern CA-NV state line will gust to 30-40 mph Sunday afternoon with RH continuing in the 8-18% range. A few light showers are possible in far NE CA and NW NV Sunday night and early Monday. The remainder of the region will be dry and cooler than normal with local NW-NE breezes Sunday and Monday. By Tuesday another low pressure trough will set up over the region and produce dry and mild conditions.

SOUTHERN CALIFORNIA

Several troughs over the Pacific Northwest will maintain a southwesterly flow aloft, resulting in temperate weather and a lack of convection through the period. No further thunderstorm activity is expected through the first half of next week. High temperatures will show little variation the next few days and will remain within a few degrees of seasonal averages. Highs will range from the 70s and lower 80s in the mountains to the mid 90s in the San Joaquin Valley. Minimum RH will drop into the teens for 6-8 hours each day above 3,000 feet. RH recovery should be good, except along the I-5 Corridor and across Southern Santa Barbara County where local north winds of 10-15 mph will be possible the next 2 nights. There will be afternoon sea breezes of 15-25 mph along the central coast and in the desert interface areas during the afternoon hours. A deeper trough passing to our north may result in gusty winds of 25-35 mph in and near the desert Sunday and Monday. Warmer weather may return during the second half of next week.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

- **2018-LAW-50637, 08/22/18, 2236 hours:** The Air Force Rescue Coordination Center (AFRCC) advised of an ALNOT of a plane out of San Diego. The Cessna CN74 had taken off near El Cajon with the owner and student passenger on board, and was several hours overdue. San Diego Sheriff's Office was already looking for the aircraft prior to the Cal OES Law Duty Officer (LDO) notification. Civil Air Patrol (CAP) was activated, and at 0048 hours gave coordinates as a possible location for the aircraft. San Diego was notified of the coordinates and at 0211 hours, located a crash site in the area. Due to steep terrain, trees, and rocks they were unable to land or verify the tail numbers on the plane. San Diego SAR Coordinator was notified of the incident. At 0630 hours, search efforts were grounded due to fog and limited visibility. **Update:** As of 08/23/18 at 1007 hours, NTSB notified. Tail number and two fatalities confirmed. **Mission Ongoing.**
